

Free Cisco 5G Catalyst Cellular Gateways!¹

To help you gain better application performance with SD-WAN & 5G Fixed Wireless Access (FWA), Verizon and Cisco have teamed to provide a free 5G Gateway with the purchase of a new Cisco SD-WAN router, license and Verizon managed service¹. Ex. Buy a thousand new routers w. SD-WAN licenses and get 1,000 free Gateways!

This offer reduces costs while delivering the speed, reliability and security of SD-WAN with 5G FWA.

Why 5G FWA with SD-WAN

Network diversity

By utilizing 5G as a primary network service for SD-WAN, customers gain true network diversity. Two wireline connections can be susceptible to the same outage conditions caused by construction, storms, etc. 5G wireless WAN provides network diversity, maximizing network reliability, and SD-WAN application performance.

Nationwide footprint

Verizon provides a nationwide footprint for 4G & 5G Business Internet services. For customers with a national footprint, aggregating different broadband providers is complex, and working with an aggregator adds cost and varying SLA support. Working with a single provider, and a single SLA structure reduces cost and complexity.

Lightning Fast

Verizon 5G FWA service deployment times are measured in hours, not months. Once enrolled in your 5G FWA plan, just add the active SIM to your Catalyst 5G Gateway, it phones home for its configuration, and you are good to go! Additionally with no data caps, affordable high speed 5G FWA service offers the application performance and network reliability you need.

Easy to deploy

- Zero touch provisioning
- Power over Ethernet
- Optimize signal strength w. Cisco dashboards

Easy to manage

- Cloud managed vManage Dashboard
- Single dashboard management for SD-WAN & 4G/5G!
- Over the air firmware updates

Secure by design

- SASE Security w. Umbrella SIG
- Immutable Identity & SIM Security
- US DOD 1A certified

Carrier grade

- Global wireless carrier certifications
- Dual SIM for dual carrier
- High Availability Auto SIM Auto APN

1. Offer expires 12/31/23. All orders must be booked by this date to qualify. The free 5G Catalyst Cellular Gateways (model CG522-E) offer is available with the purchase of a new Cisco ISR or Catalyst series router with an SD-WAN license (Advantage tier 1 or higher) and Verizon managed service for the router and the gateway Ex. buy 1,000 new routers with SD-WAN licenses and Verizon management, gain 1,000 free 5G gateways. Customers are responsible for taxes, shipping, maintenance (Cisco SmartNet or Verizon Care maintenance) and Verizon management fees.
